How to use our Starters (20/21 Revision Starters)

Each slide contains four questions and a clock (Year 2 onwards)

The first question will relate to the previous lesson content.

The second and third question will be revision from the previous year group.

The fourth question is an arithmetic question.

We use blue backgrounds to help any pupils who struggle with reading from white backgrounds. The children can use whiteboards to answer the questions with the questions displayed on the screen or the printable version of the starters can be used. These can also be used with front class teaching.

You will see that some of our questions are divided by a line- this will show that the question is differentiated. The children can choose which question they answer, they do not have to answer both questions.

We are confident that these will be a great tool to revise potential missed learning for your pupils.
