

Have a go at answering these questions.

You may not have a metre stick at home but you could use a tape measure or use a ruler to measure a piece of string that is 1 metre long and use that.

## Measure Length (m)

Measure objects with a metre stick and sort them into groups.

Shorter Than 1 Metre

Longer Than 1 Metre

Can you find something that measures exactly 1 metre?

Count in jumps of 10cm to the end of the metre stick.

1 metre is equal to \_\_\_\_\_ centimetres.

## Measure Length (m)

The slide is shorter than 1 metre.

Do you agree?  
Explain why.

Which measurement could match the height of the swing? Tick it.

2 Centimetres

20 Centimetres

2 metres

20 metres

Would you measure these toys in metres or centimetres?

## Measure Length (m)

I have chosen which unit I would use to measure these objects. Do you agree with my work below?

Measure in metres (m)

Measure in centimetres (cm)

What other objects could you add to each group?
