

My Year 2 unit on IT All Around Us will help me with this unit.

This unit will help me with my Year 4 unit on The Internet.

Key information

Vocabulary

Network	A number of connections linking things with each other
Computer Network	A network made up of multiple devices
Network Switch	Enables multiple devices on a network to be connected
Server	An important computer that stores files and manages the network
Router	Provides the internet connection

Key Computing Skills and Knowledge

- Know that digital **devices** accept **inputs**, **process** those **inputs**, then produce **outputs**
- Know the **input**, **process** and **outputs** of several **digital devices**
- Know that **digital devices** can be used for different activities
- Know that **digital devices** and **non-digital devices** have different benefits for different activities
- Know the benefits of **computer networks**
- Know that some **devices** in a **network** are not **connected** by wires and that their connection takes place via **wireless networking (Wi-Fi)**
- Know that **wireless devices connect** to the network switch through a wireless access point (WAP)
- Know that **wired devices** are **connected** to the **network** by a **network cable** which is plugged into a **network socket**
